

(Land Rover Discovery 4 2014+ grill shown for illustrative purposes)

Remove the grill from the car and place on a clean soft work bench to avoid scratching.

Fit the white cutting guides onto the grill, they are numbered on the back 1 – 4, 1 should be on the left as you are looking at it.

Ensure the cutting guides are securely clipped on and tight up against the upright supports and the edge of the grill.

Check and double check that you are happy with the fit of the cutting guides, a hack saw blade is best to cut the grill.

Cut slowly and ensure you cut straight and do not cut into the guide.

Cut the top and bottom support posts, we suggest you cut these as close to the centre piece of grill that will be removed initially as its easier to trim them later than to cut too much off.

WARRANTY & DISCLAIMER - Terrafirma products are warranted free from defects in materials and workmanship for a period of 12 months from the date of retail invoice. Terrafirma does not warrant that the products manufactured or marketed by it comply with the laws of the country where those goods are purchased or used. It is the sole responsibility of the purchaser to ascertain whether products being purchased, or the fitting of those products to any other object, comply with local laws. This warranty covers structural defect and workmanship but does not cover finishes, labour charges for removal or refitting, freight costs, accident damage, misuse or abuse, damage due to incorrect or improper fitment or application, modified product, faulty design or consequential damage of any kind. Damage or defects caused by collision, alteration, improper installation, road hazards, adverse conditions or usage for any other purpose other than normal private usage are not covered by this warranty. Terrafirma shall not be liable for any other claim relating to the use of the product and any indirect special or consequential damage or injury to any person, company or other entity. All claims must be accompanied by the original retail invoice and should be submitted to the supplying Allmakes 4x4/Terrafirma distributor. This warranty covers only the replacement of the product or part concerned. The decision remains solely at the discretion of Allmakes Ltd. The information contained in this catalogue was correct at the time of going to press. Allmakes/Terrafirma and its associated companies reserve the right to alter the range and any product specifications without notice. Always consult your Allmakes/Terrafirma distributor for the latest product information and specifications. The Terrafirma range of products is constantly being evaluated for enhancement and improvement to make sure the level of quality and performance is as expected.

Find the correct mounting brackets, they are also numbered from 1-4 the same as the cutting guides. Test fit them to your cut grill.

After checking remove the mounts, using the shorter bolts and washers where required bolt the correct mount to each side of the light, slide the light and mount onto the centre part of the grill first and then onto the outer part.

When you are happy with the fit, drill the hole through the grill to line up with the hole in the outer mount and use the supplied screw to secure. Do not over tighten.

Take the dedicated wiring harness supplied with the kit.

Connect each light to the harness with the waterproof connectors run the wiring neatly behind the grill to behind the near side headlight.

The black wire with ring terminal needs to go to a good earth.

The red wire with a ring terminal goes to the positive on your battery.

Secure the relay in a safe place near to the battery.

The blue wire is the trigger and should go into the main beam feed at the back of the headlight, this is a blue / Grey wire.

*note Discovery 4's have a FET system which means the wiring is only live when everything is connected and on so you will not be able to get a test light to illuminate without the connector being on the back of the headlight.

**note If you are not 100% confident then the wiring part of this installation should be carried out by an appropriate garage or auto electrician.
